MANAGER COMMENTARY

Meetings with the management teams of our portfolio companies resulted in the increase of our holdings in, among others, **Medacta**, **Borregaard** and **Corbion**. In addition, positions in **Technogym** and **Paradox** were slightly reduced. Medacta has now become a top five portfolio holding, as we are convinced of its attractive growth opportunities. Our recent visit, during which we also met the family members who are active within the company, confirmed our growth assumptions. Borregaard updated investors, discussing in much detail the many opportunities for further product specialisation for its numerous markets. **SOITEC** saw a sharp decline in its share price due to rumours of disappointing iPhone 16 sales, in which SOITEC products are used. The discussion with Corbion's CEO gave us confidence that the major factory expansion in Thailand is on schedule and the algae factory in Brazil is showing excellent volume and margin developments. The ongoing rebalancing of our portfolio resulted in a further reduction in Technogym and Paradox, also given Paradox's share price performance of 24% this month. In both cases, these companies remain significantly represented in our portfolio,

STRATEGY

Juno invests in highly profitable listed companies, with predictable earnings growth and preferably with management or a (founding) family as their main shareholders. Listed European family-owned companies operate with a longer term perspective and are more successful than non-family-owned companies¹⁾.

Juno aims to achieve capital growth by investing in a highly concentrated portfolio of European companies. Selection takes place based on its proprietary fundamental, bottom-up analysis including on-site visits.

A high or rising return on capital and large free cash flows are good indicators of strong companies that we are interested in. We invest with a time horizon of 3 to 5 years.
